

Endurolyte

ELECTROLYTE FOR HORSES PRODUCT CODE: 9026 (20 lb bucket)

FEATURES AND BENEFITS:

- Designed to replace electrolyte levels typically lost in sweat, including sodium, chloride and potassium.
- Fortified with calcium and magnesium, which can be lost in high levels in horses during endurance-type exercise.
- Formulated with minerals in the form of citrates to facilitate absorption.
- Contains moderate dextrose level to enhance electrolyte absorption and help replace blood glucose.
- Palatable and easy to feed as a top-dress or in water.

FEEDING DIRECTIONS:

Feed 1 scoop per 1,000 lb. horse per day top dressed on feed or dissolved in water. To dissolve, use 4 scoops per gallon of water. Each scoop is approximately 1 oz. or 28.35 grams.

CAUTION: This is not a complete supplement. Vitamins, minerals and salt must be added along with grain to make a complete ration.

GUARANTEED ANALYSIS

(per 28.35 grams) Sodium (Min.) 4.5% Chloride (Min.) 10.0% Potassium (Min.) 3.5% Calcium (Min.) 0.1% Magnesium (Min.) 0.5%
